

Car Rental Model

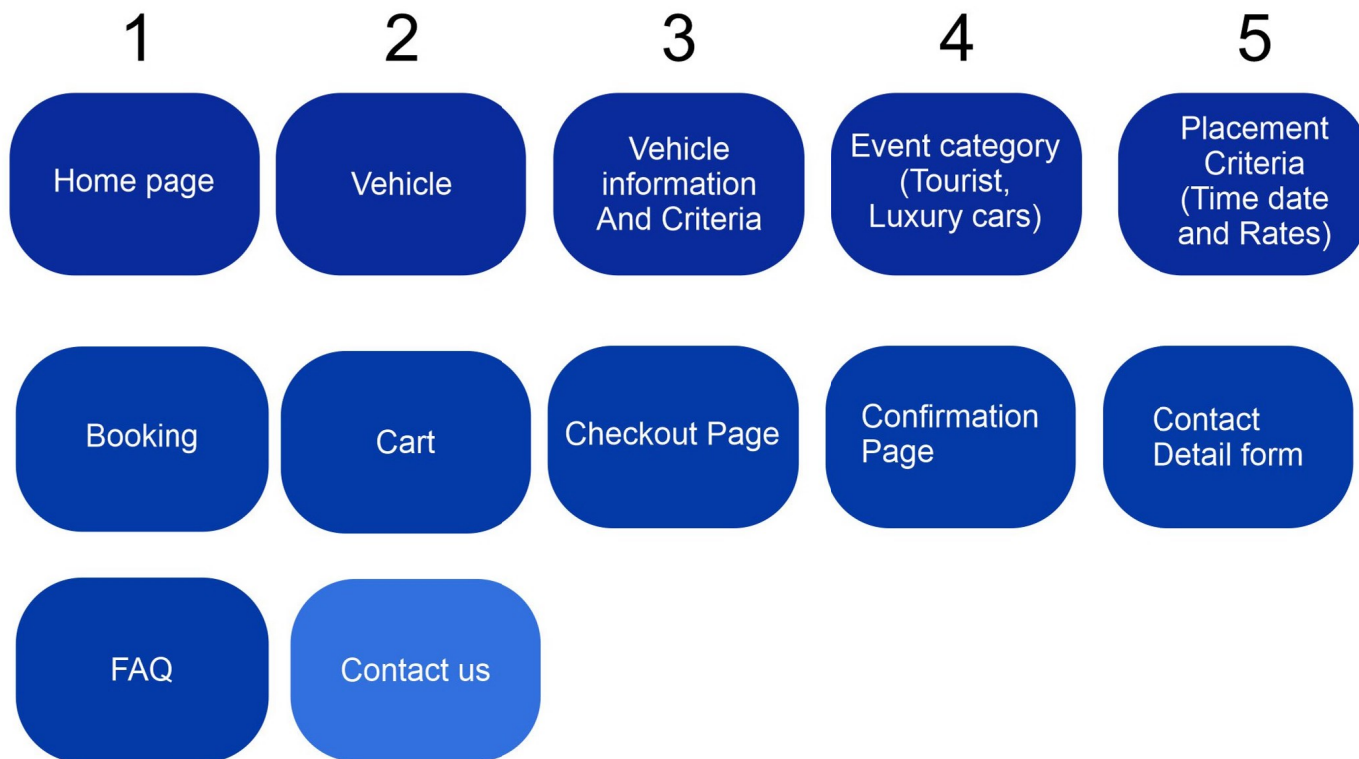

When a user enter in my website it first shows the vehicles and when the user scroll it shows the list of Vehicle and also there a navbar that use to navigate.

When a User select the vehicles then it shows the callout to select the date and duration and also the option of with driver or self driving then it shows the rates with respect to chosen vehicle and apply the discount if applicable then it moves to payment option and customer details to confirm the order and when all the formalities fullfill it moves to Home page again

Fronthand: **NEXT.js**

Backhandhand: **SANITY**
